Recommend Similar Products

We help customers find the desired products efficiently and increase the conversion rate of the webshop. This plugin automatically generates similar product recommendations.

How to use this module

1. Install the module

2. Request your API key. Follow the link in module configuration "Please click here to get your API credentials" or open in browser this link https://www.visualsearch.at/index.php/credentials/ and enter your email address.

3. Please wait for an email with your API key

4. In the configuration, insert received API key and press "Validate API credentials"

5. Switch to live mode and press "Save"

This module will bring you these benefits,

- Efficient search for desired product
- Optimized conversion rate for the webshop
- Longer time spent in the webshop

Below is an example of visually similar recommendations of a red jacket. Other examples can be found in our demo store here: https://prestashop.visualsearch.at
